Subject: Tranparent TopWindow
Posted by galious on Wed, 21 Jan 2009 22:26:09 GMT

Hi,

is it possible to create transparent TopWindow.

Calling TransParent() in the constructor doesn't seem to work as the window-background is still painted on my Windows machine.

I would like to have a transparent top window (so you see the windows behind it or the desktop of the user) and still be able to show a text or image.

Best regards,

Martin
