I just did the svn update.
Opened Tutorial/Gui01.
Switched package configuration mode from GUI to GUI MT and get the same errors.

I am not sure how to tell version of U++ (svn update was done February 5, 2009. is it enough?)
I am compiling with MinGW on WinXP.
`g++ --version` reports: g++.EXE (GCC) 3.4.5 (mingw-vista special r3)
