This is what I often have to do - put the proper color to code..

```
w.DrawText(... Color(222, 222, 33));
```

if on toolbar there could be a small button to invoke color window that would be great.. And if there could be ability to choose the inserted color format...

```
Color(r, g, b)
```

```
r, g, b
```

```
#xxXXxx
```
