loki wrote on Tue, 10 February 2009 16:25Hello,

I want to use UPP under Linux (Ubuntu 8.10 64Bit(Generic)). But the problem is, that if i open and close the menu in the IDE, then the programm does not accept input from the keyboard anymore. To get the inputfocus back, I can maximize the window or open some PromptOK Dialog.

I am using the svn 745 (64Bit) build.

The same problem appears in all UPP-Programms I compile.

Please, provide more details. How do you open the menu?

(I am using Ubuntu 8.10 64bit quite often and never noticed this problem - obviously I am not doing the same thing...)

Mirek
