bahriesz wrote on Thu, 19 February 2009 07:49Hi

Anybody knows how to catch http client time out error? So I can display timeout error message.

Current implmentation of http client will freeze the GUI if it in the process of fetching the URL.

thanks.
You can set the timeout to whatever you like, but what you really need is to run the HttpClient in a seperate Thread (and compile with MT).

I believe you will get a Null string returned if it times out.
