hi guys...  
its been a while...  
anyway. i'm back and i played a little bit around.  
so, my question is this:  
in the image-editor or layout-editor:  
once i have layouted something or created an image and compiled  
i only get to see the preprocessed stuff. the only workaround is to restart theide. there seems to  
be no obvious neither obscure way to edit an image twice.

halp! its frustrating.
