aftershock wrote on Thu, 26 February 2009 11:39Hi,

I compiled the ide using 2008.1beta...
I used uppsrc/ide package to compile.
I used mingw debug version.
I placed the executable in the upp directory.
However, when I run it, it does not run as the original exe.
When press f5 to run a project which I already ran in the original exe, I get an error invoking gdb..
assertion failed at uppsrc/core/other.h line 17...

Thanks.

Compile with MSC.

Mirek
