aftershock wrote on Thu, 26 February 2009 11:39Hi,

I compiled the ide using 2008.1beta...  
I used uppsrc/ide package to compile.  
I used mingw debug version.  
I placed the executable in the upp directory.  
However, when I run it, it does not run as the original exe.  
When press f5 to run a project which I already ran in the original exe, I get an error invoking gdb..  
assertion failed at uppsrc/core/other.h line 17...

Thanks.

Compile with MSC.

Mirek
