Thanks!

cbpporter issue #016: Clock minute buttons bug
Fixed.

Could you apply the patch from first post (Paint) too?

Quote:
I always wondered why time values are not ints? Just to save memory?

Wasn't there when that happened, but my guess: yes!

Quote:
I think also that datetime picker must have ok and cancel button. I found unintuitive for users
cliking in the center of clock to accept time change only.

Never tried datetime picker. I'll look over it and tell you what I think.
