What kind of programs you create using Ultimate++?

Interesting to know how many people write complete programs using Ultimate + +, and what percentage of them - the commercial (by delivery way).

A couple of words - why.

What you create using Ultimate++ (by delivery way)
(total votes: 13)

Commercial Soft 6/(46%)

Open source soft (free source - that is an open publishing on its site) 1/(8%)

Free soft 3/(23%)

Just write a test program for yourself, to explore the C++ and Ultimate++. 3/(23%)
