Novo wrote on Sat, 21 March 2009 20:50I think before drawing attention to U++ we should get prepared to explain that U++ is not just a cool C++ library and an extremely useful developer's tool, but also a system, which is completely different from everything else that C++ developers got used to use.

Otherwise we will have to answer the same questions over and over again.

It took me a lot of time to realize how huge is the difference between U++ and everything else.

Just for someone, it is important that while the novelty product, Ultimatepp is 100% C++ language with strict syntax.

For me, as I understand it, it was a very important factor.
