fudadmin wrote on Thu, 30 March 2006 15:15 But where to insert the code for popup context menu?

LineEdit::WhenBar

Quote:

It works quite nicely (I rewrote HighlightLine implementation)

Why do you think I should use LineEdit?

Well, as part of CtrlLib, it has quite fixed interface.

However, in fact, I suggested that just as option. I believe that deriving CodeEditor is a way to go.
