Hello,
I am new to Upp. I am trying to do my first steps.
Reading the Alex thread concerning droplist colors I decided to try it using a different display but I lost the selection bar. Please try the program that is in attachment. It seems that the blue bar (selection bar) is drawn behind Display painting. how to fix this?

By the way, which is the best way to change switch control fore color. I tryied with Display but it seems that switch controls do not support it.

Is this a bug?

Thank you very much

Jose
