Hello all

When compiling an application with MSC9 I have got these three warnings:

c:\desarrollo\upp\uppsrc\core\Mt.h(317) : warning C4099: 'Upp::Mutex::Lock' : type name first seen using 'struct' now seen using 'class'
c:\desarrollo\upp\uppsrc\core\Mt.h(209) : see declaration of 'Upp::Mutex::Lock'
c:\desarrollo\upp\uppsrc\core\Mt.h(325) : warning C4099: 'Upp::RWMutex::ReadLock' : type name first seen using 'struct' now seen using 'class'
c:\desarrollo\upp\uppsrc\core\Mt.h(229) : see declaration of 'Upp::RWMutex::ReadLock'
c:\desarrollo\upp\uppsrc\core\Mt.h(333) : warning C4099: 'Upp::RWMutex::WriteLock' : type name first seen using 'struct' now seen using 'class'
c:\desarrollo\upp\uppsrc\core\Mt.h(230) : see declaration of 'Upp::RWMutex::WriteLock'

The problem is fixed by changing "struct" by "class" in Mt.h class Mutex member Lock and in class RWMutex members ReadLock and WriteLock.

Best regards
Koldo
