Subject: src package should now work just fine in Linux and BSD Posted by mirek on Sun, 19 Apr 2009 12:02:29 GMT

I have spend some time trying to fix src package.

I believe it should now work quite fine on most system, including initial U++ setup.

I mean

make make install ~/theide

and you should be running.

I would be glad to hear reports how well it really works. Anybody with POSIX system, please report!

(If you happen to fix 'domake' or 'doinstall' scripts too, post here
