koldo wrote on Wed, 22 April 2009 02:14 One question

Now the file that appears is "upp-x11-src-1091.tar.gz".

Does it mean that it only can be used in Posix systems?

Best regards

Koldo

Well, the make/install (Makefile, doinstall) process is for X11/GCC systems only (and, I guess, right now it will not work on all either - but that is something to fix gradually).

Of course, there are standard U++ packages with universal sources in it.

I believe it might work on all x86 Linuxes and maybe all BSDs, somebody should check with Solaris...

Mirek
