phirox wrote on Mon, 20 April 2009 09:20Also related to compiz. With the latest svn version I have this bug that characters I type sometimes get multiplied. "LLikke thisss when youu ttype".

I was wondering if anyone else noticed this.

I'll check tonight if it is a specific compiz module that causes this, and if I can find out which reversion it started occuring.

R807 there was accepted related submitted patch...

The file is CtrlCore/X11Proc.cpp.

(Use svn history in theide).
