Hello unodgs

It is difficult for me to find the root cause. I have got the exception in three places, always trying to access hitems[] elems over its scope and always when moving the mouse over the Grid time after the Grid is filled with data.

I suppose this is circumstantial, but I usually use grids with few rows but hundreds of columns.

I have began to enclose the code with problems with `if (hitems.GetCount() > hcol) {`

`...`

`} This is not the solution but it lets me follow.`

Best regards

Koldo
