Subject: Events to spin buttons, add mousewheel too.
Posted by mingodad on Sun, 03 May 2009 22:10:19 GMT

I want to react when users change month or year but currently I can't see where to attach my code.

Another good improvement would be the controls to change with mousewheel too, like FLTK and eve pageUp/PageDown, and keyboard navigation too, actually it can't be focused or participate on the keyboard focus switch.

An example attached using msegui http://msegui.org/
