Hi ,

I'm getting the following when trying to build the ide\Debuggers package in windows:

Linking...

(option '-O 2' ignored)

__main: duplicate

-> used: libmingw32.a:gccmain.o:1

-> discarded: libgcc.a:__main.o:1

1 undefined symbol(s):

_WinMain@16 (referenced from libmingw32.a:main.o:1; _main; .text)

linking aborted due to fatal errors

collect2: ld returned 1 exit status

Could you please advice/

Thanks,

gnunt
