sergeynikitin wrote on Mon, 04 May 2009 12:22I propose to do in .t file a line like "ABCDEFG ...... abcdefg ..... vwxyz ...." with the correct sequence of characters, then when you switch the language will work correctly sort and compare strings.

Will not work for all languages in this simple form. For example cz and sk have special character "ch" (between "h" and "i" in alphabet). The funny thing is, that this correct local sorting always annoys hell out of me and I absolutely hate it (and never ever needed it). Then again, most of the time I use English anyway.
