Subject: Re: pregexp isn't compiling complaining about undefined symbols Posted by mirek on Sun, 10 May 2009 11:03:44 GMT View Forum Message <> Reply to Message

I believe the problem is in including

#include "lib/pcre.h"

(Of course, as long as you did not add that to make it work...).

In any case, I have just checked reference example:

http://www.ultimatepp.org/reference\$RegExp.html

and it compiles and works just OK.
