[BTW (fudadmin - are you reading this?) - does preview message work - how do you get back to your message after previewing it?]

I usually scroll using vertical scrollbar of my Opera... What is a problem?

uh, um well, I'm used to an app we have at work that requires browser back button after preview, so that's what I did and something went wrong (I think, anyway I restarted my post) - but I just tried it again on this message and it seemed to work ok - so now I'm trying the vertical scrollbar way - works too - ok, cool. (using Mozilla)
