Subject: Re: Where to add event function in theide
Posted by mirek on Thu, 21 May 2009 14:40:54 GMT

Layout designer creates only the layout, it knows nothing about the final class.

There is a helper for adding THISBACKs (which is I guess rough equivalent to 'even function') in theide - just press Alt+T. Anyway, I am a little bit afraid not many use it now (I do not), maybe it would need some refinement, maybe adding handlers normally (with Assist and Alt+C) is good enough...
