d_th wrote on Sat, 23 May 2009 17:57Hello,

i have a problem to cross compile any example with different precompiled Tool chain from Debian Etch to an ARM Linux.

can you give me some support to solve my Problem please?

Dieter

Definitely!

Well, the error is obvious. Nobody so far got U++ work with ARM Linux.

Anyway, it should be quite simple. Check Core/config.h - and get it working.
