Hi,

Still in the process of compiling "Days" example but making some progress..
The build is going forward now but unfortunately, I bumped into a linking error:

----- Days (GUI MAIN MSC8 DEBUG DEBUG_FULL BLITZ WIN32 MSC) (9 / 9)

pngreg.icpp

pngupp.cpp

plugin\png: 3 file(s) built in (0:08.35), 2784 msecs / file, duration = 10875 msecs, parallelization 100%

main.cpp

Days: 1 file(s) built in (0:09.13), 9133 msecs / file, duration = 15453 msecs, parallelization 1%

Linking...

uuid.lib(unknown_i.obj) : fatal error LNK1103: debugging information corrupt; recompile module

There were errors. (2:27.04)

Any idea what could the reason be for that error?

Br

Norrin
