Hello all

Thank you for your review.

Fixes done:

- Tables in SysInfo now are visible. For any reason in the help editor the fonts seem bigger than when help is used.

- I have changed the styles in "gray sections" and font size is 10 everywhere but in titles

- Anyway the hyperlinks work half well: they jump to the right document but not to the function to be highlighted. It can be seen in SysInfo.

Best regards
Koldo
