I think when I first use TheIDE, the most concern is how to create a new project, how to add an exist cpp file to the project, and how to set the extra include path, libraries path, etc.

On the first time user use TheIDE, I think open "Getting started with TheIDE" or "[http://www.ultimatepp.org/srcdoc\\$CtrlLib\\$Tutorial\\$en-us.html](http://www.ultimatepp.org/srcdoc$CtrlLib$Tutorial$en-us.html)" maybe helpful.
