norrin wrote on Fri, 29 May 2009 07:09Hi,

Thanks for your reply... it is quite possible to have some remaining installation issues. I gave it a try and changed the build option from DEBUG to OPTIMAL and that passed OK then.

I am not sure why I could not build for debug though.

For SDK, I have installed it as you need it otherwise you could not get through the linking part.

Norrin

You can also try "Build/Clean UPPOUT". That will delete ALL intermediate files.

Mirek
