koldo wrote on Mon, 01 June 2009 13:13Hello tojocky

GoogleTranslator works well for me without proxy, but with proxy it does not.

.....

Perhaps this problem is not due to GoogleTranslator but U++ http client. I cannot answer about this.

Best regards
Koldo

I use not default port and proxy address and everything works fine!

Add:

Maybe you didn't check option "Use HTTP proxy" on the connection tab in options?
