3. It is sufficient to write just

```
#define LAYOUTFILE "editmask.lay"
```

if you keep this file in your package folder where other files reside e.g in c:\MyApps\tabs\ ...

Unfortunatelly, this works only with MSC compilers.

Portable way is

```
#define LAYOUTFILE <MyPackage/my_layout.lay>
```

```
...
```

Mirek

Sorry, sometimes I'm too much lazy
