I do not see anything wrong. What is "two ends character"? Last two characters of line?

first and last a characters of line!

Quote:

Actually, you have broken MOVE operation here.

Default is to MOVE the text. That involves deleting the source text. If you want to COPY, you have to hold Ctrl key.

Mirek

No,I don't break move operation.In fact, the operation to remove the select source is by the DoDragAndDrop.In the windows,"if(DoDragAndDrop(ClipFmtsText(), iw) == DND_MOVE) { RemoveSelection();" appears to be no problems. but for Ubuntu,some time move text may lose.
