I think Thelde could benefit from better icons! Why can we count the pixels on almost all Thelde icons? can't we get someone to create nice anti-aliased ones?

U++ has come a long way the past years in terms of technical improvements, but Thelde still look like it's from 1996 ?

I just noticed one icon that looks better: the SVN sync icon!
It's a start, but I think we should re-vamp Thelde completely!

Thoughts ?
