```
// set the widths of each coloumn  
arr.ColumnWidths("25 3 5 12 8 8 2 3 3 3 3");
```

BTW, there is a cheap and dirty but usefult trick how to speedup setting those widths - run your app in debug mode, adjust your columns (in your app!) and then click on those columns (HeaderCtrl) while holding "Ctrl" key. Your computer should beep and place above code to clipboard (Paste it to your application code).
