I think we could replace some (or all??) icons right away using

<http://www.famfamfam.com/lab/icons/silk/>

they are 16x16 icons (i think) but at least they could give Thelde a completely new look without much design time.

I also think, if we create an list of icons and specify what we want an icon to represent, we could let robert create even better icons for us! We do need to specify 'what' exactly we want to 'express' with the icons we need

Greetings,

Jan
