skyhawk wrote on Fri, 12 June 2009 04:38Well I have a weird AGP VGA card (the bios says, at bootup: 'not for production use'

But I havn't seen other problems like this with any other programs.
I've also installed 'Compiz Fusion' but again, i'm only seeing this problem in TheIde.

I will try to rule out some of these 'oddities'

Greetings,

Jan

It is also possible that you are doing "something else" then the rest of us... Like chossing some special places to click etc...

Maybe some screenshots?
