skyhawk wrote on Sun, 14 June 2009 17:22I can reproduce the behaviour only with the System->Administration->Hardware drivers->"NVidia accelerated graphics drivers" enabled. If I disable it, thelde works as excepted...

will try to make some screenshopt tomorrow

Sounds like another Compiz trouble

Very likely, it just looks like not being selected, but it is just visual artifact. Maybe you can try to delete it or hide & restore window to find out.
