---

I'm trying to change the alignment of a fixed AND merged cell.  
I can't figure out how to do.

I attached a little image for better explaining what I would do.

I'd like the columns First and Second centered.

Before posting I tryed without any result both the SetFixed and the .AlignCenter() method (I'd also called .AlignCenter() for every col ).

Nevertheless the Set method works in non fixed cells

I post the code here:

Any clues?

Thanks in advance.

p.s.

Many thanks for the BEST FREE GRID CONTROL EVER SEEN

```
FrmMain::FrmMain()
{
    CtrlLayout(*this, "K *-* v. 0.0.1");
    this->Sizeable(true).Zoomable(true);

    this->mgrdMain.AddColumn("First").AlignCenter();
    this->mgrdMain.AddColumn("First2");
    this->mgrdMain.AddColumn("First3");
    this->mgrdMain.AddColumn("First4");
    this->mgrdMain.AddColumn("First5");
    this->mgrdMain.AddColumn("First6");
    this->mgrdMain.AddColumn("Second");
    this->mgrdMain.AddColumn("Second2");

    this->mgrdMain.AddRow("Col1", "Col2", "Col3", "Col4", "Col5", "Col6", "Col7", "Col8");

    this->mgrdMain.SetFixedRows(2);
    this->mgrdMain.JoinFixedCells(1,0,6,0);
    this->mgrdMain.JoinFixedCells(7,0,8,0);

    //this->mgrdMain.GetColumn(1).AlignCenter();
```

```
//this->mgrdMain.Set(0, 0, AttrText(AsString(1000)).Align(ALIGN_CENTER) );
//this->mgrdMain.SetFixed(0, 0, AttrText(AsString(1000)).Align(ALIGN_CENTER) );

this->mgrdMain.AddRow("R1", "134", "0.135", "0.134", "On", "100000", "", "");
this->mgrdMain.AddRow("R2", "234", "0.235", "0.234", "On", "100000", "0.235", "50000");
this->mgrdMain.AddRow("R3", "334", "0.335", "0.334", "Off", "100000", "", "");

}
```
