Can you at least write what kind of device is that? Some manufacturer, chips used, etc?

Here is for example some open source driver for touch screen controller chip (just chip, if I understand it correctly, you can attach to it any ordinary 4-wire touch... I'm not expert in this so I may misunderstood something):
 http://opensource.wolfsonmicro.com/content/wm97xx-touchscree n

Or get kernel source from http://www.kernel.org/ and search trough the source a bit for some "touch". Don't blame me if you get lost, I would too.
