mrjt wrote on Fri, 19 June 2009 03:38Bugger. I've never tested it with Compiz and none of the floating/docking code has changed, so perhaps it's that.

This might be much more difficult to fix, what I need is a log of X events during window draging and dropping.

Sorry for making you a problem again.

I attached a log of X11 events for DockingExample1. It is created using xtrace. I hope that it is what you need.

TIA
