Sorry Koldo,

I understood wrong.

The problem is not in u++ but in MinGW TDM 4.4.0?

Right?

I tested for me with old MinGW and have not errors.

koldo wrote on Tue, 23 June 2009 16:55Hello Ion

Excuse me, I do not understand you very well

After the tests I compile in "GUI" (not in "GUI SSE2") and for the end source if SSE2 code is included I include compiler options "-msse2 -mfpmath=sse" and "/arch:sse2".

Best regards

Koldo
