ptDev wrote on Fri, 26 June 2009 09:18Found the correct places for the option now, thank you so much .

BTW, if you're considering returning to bundling U++ with MinGW, maybe it would be useful to use the new GCC 4.4.0 version and have this option set as default?

Right now I believe that somebody should take over this as maintainer and release mingw along with "major" releases into sourceforge.net.
