Hello ptDev

Copy the file libtcc.dll to "C:\WINDOWS\System" or change in main.cpp

Tcc tcc;

for

Tcc tcc("libtcc.dll location with full path");

It was my fault: I did not documented that clearly and I left Tcc tcc; outside the try {} block in main.cpp so that the exception caused for not finding the libtcc.dll was not caught.

Best regards
Koldo
