Subject: function list is not correct
Posted by aftershock on Tue, 07 Jul 2009 09:10:02 GMT

Hi,
I downloaded a new version of Ultimate.
The list of function that appear when I press control+g is not complete.

As far as I can see it stops working when it encounters this:

struct something
{

} varname;

It breaks after varname;

It also breaks if there are double ;s

E.g.
 string inseol = "\n"; ;
