Hello all

I think the same. Both seem to work but Botan is more difficult to match with Upp.

So for me it is better a wrapper to Crypto++ following your comments and if possible my suggestions.

Best regards  
Koldo

Addition. Two links

- Integration with Msc in <http://www.codeproject.com/KB/tips/CryptoPPIntegration.aspx>
- Libraries comparison in <http://idlebox.net/2008/0714-cryptography-speedtest-comparison/>

Other thing Rui. If you would not have time we are here to help
