BTW, if you're considering returning to bundling U++ with MinGW, maybe it would be useful to use the new GCC 4.4.0 version and have this option set as default?

Right now I believe that somebody should take over this as maintainer and release mingw along with "major" releases into sourceforge.net.

Mirek

I can do this job! But, maybe I have not permission on sourceforge.net.
May be will be better to upload to http://code.google.com/p/upp-mirror/ ?

I tested on mingw with GCC 4.4.0 and works fine!
