Subject: Re: Mingw/GCC 4.4.0 linker warnings
Posted by koldo on Fri, 17 Jul 2009 11:20:34 GMT

Hello ncompoop

I have just downloaded MinGW gcc-4.4.0 from SourceForge and the last Upp available (upp-x11-src-1422.tar.gz), and I have compiled TheIde with MinGW-Speed.

I have not found any warning.

I enclose the compiler output.

Best regards
Koldo

PD. I have chosen TheIde as it is a big program. In fact TheIde compiled with MinGW is not usable.
