Hi,

since last SVN update (now at 1434) the IDE editor and output window show strange font (the width between the chars is too big).

Please see picture:

Please, can somebody look at (my OS is Windows 2000 english).

Another small issue, but I ever stumble across is in the about dialog.

It says Copyright (C) 1999-2008 Ultimate++ team, should be 2009

Thanks for looking, and keep up the good job, Mirek.

Hans
