luzr wrote on Wed, 05 April 2006 20:54PS, note this nice gem as well:

x.colorcount += (-q >> 31) & 1;

Mirek

Do you feel like explaining?

I'm sure you know that right shift of a signed negative value has an implementation defined result and that int isn't always 32 bits and ... why would you write obscure code like this ???
