Hello Mirek,

It is not so important... but the StatusBar::StatusBar() method have redundant code. Property frame.style is set double with same value.
here is the original code:

```
StatusBar::StatusBar()
{
 Height(5 + max(16, Draw::GetStdFontCy()));
 frame.style = frame.style = &StyleDefault();
 SetFrame(frame);
 AddFrame(grip);
}
```

And I think must to be:

```
StatusBar::StatusBar()
{
 Height(5 + max(16, Draw::GetStdFontCy()));
 frame.style = &StyleDefault();
 SetFrame(frame);
 AddFrame(grip);
}
```
